

EU Mobility package 2022

The Mobility Package is EU's new set of rules for road transport applicable from February 2., 2022. The purpose of the EU mobility package is to secure better terms for truck drivers , securing new and existing rules will be followed, and to make it easier deal with the illegal methods. The effects of the EU mobility package will affect the planning of the transport and the costs of transports as well.

Bodotex has been notified about increasing transport prices from our transporters caused by the mobility package. We are sorry that the new legislation and the increased requirements will mean price increasements, but Bodotex will be compelled to implement these extra transport prices as from 14. February, 2022.

We appreciate your continued support and look forward to continuing successful business relationship in the future.
